

Project Name: Project 1: Voting System		Team#4
Test Stage: Unit <input checked="" type="checkbox"/> System <input type="checkbox"/>		Test Date: 3/23/2022
Test Case ID#: Election_getNumBallots_1		Name(s) of Testers: Charlie Nazarian, Haneesha Kella
Test Description: Testing getNumBallots method in the Election class		
Automated: yes <input checked="" type="checkbox"/> no <input type="checkbox"/>		Indicate where are you storing the tests (what file) and the name of the method/functions being used. Tests are stored in ElectionTest.cpp. The function being tested is getNumBallots().
Results: Pass <input checked="" type="checkbox"/> Fail <input type="checkbox"/>		
Preconditions for Test: Election.h is included. A legitimate input file is provided.		

Step #	Test Step Description	Test Data	Expected Result	Actual Result	Notes
1	Create Election Object with an input file	Election test("sampleFile.txt")	-	-	Let "sampleFile.txt" be a legitimate file. In this file, the number of ballots is specified to be 2
2	Call getNumBallots()	test.getNumBallots()	2	2	
3	Check that the value is as expected	EXPECT_EQ(test.getNumBallots(),2);	True	True	
4					

Post condition(s) for Test:

The election object is unchanged. The numBallots variable is unchanged

Project Name: The project #, name of your system, and the team#

Test Stage: Indicate whether it is a unit test or a system test.

Test Date: The date the test was performed.

Test Case ID#: A unique ID is required. Decide on a naming convention and use numbering. Example: Ballot_Shuffle_1

Name(s) of Testers: List the names of anyone involved in running this test case.

Test Description: Describe briefly the test objective.

Automated: Indicate if the test is completely automated or being checked manually. (If you have methods running the tests and checking results, select "yes". If you are manually checking results, indicate manual by selecting the "no.")

Results: Indicate if the test passed or failed.

Step #: You will be listing the test steps in order. This number is the step number in the process.

Test Step Description: Details of the test step.

Test Data: What the test data will be for this step. Be clear on what the input data will be. If using a specific file, be clear on the name.

Expected Result: What result are you expecting from the program component or system.

Actual Result: What result were returned based on the test.

Post condition for Test: What will be true after the test has been run? Has the state of the system changed in any way?

Notes: Comments and notes for you and your team members.
