

Project Name: Project 1: Voting System		Team#4
Test Stage: Unit <input checked="" type="checkbox"/> System <input type="checkbox"/>		Test Date: 4/19/22
Test Case ID#: Candidate_setVotes_1		Name(s) of Testers: Charlie Nazarian, Haneesha Kella
Test Description: Testing the setVotes method inside the Candidate class		
Automated: yes <input checked="" type="checkbox"/> no <input type="checkbox"/>		Indicate where are you storing the tests (what file) and the name of the method/functions being used. Tests are stored in CandidateTest.cpp. The function being tested is setVotes().
Results: Pass <input checked="" type="checkbox"/> Fail <input type="checkbox"/>		
Preconditions for Test: Candidate.h is included. A candidate object exists to call the function on		

Step #	Test Step Description	Test Data	Expected Result	Actual Result	Notes
1	Create Candidate Object	Candidate test;	-	-	
2	Call the setVotes function	test.setVotes(5)			
3	Check to see that the number of votes for the candidate is correct	EXPECT_EQ(test.getNumVotes(), 5);	Pass	Pass	
4					

Post condition(s) for Test:

Candidate object's numVotes variable is set to the inputted value for the setVotes function

Project Name: The project #, name of your system, and the team#

Test Stage: Indicate whether it is a unit test or a system test.

Test Date: The date the test was performed.

Test Case ID#: A unique ID is required. Decide on a naming convention and use numbering. Example: Ballot_Shuffle_1

Name(s) of Testers: List the names of anyone involved in running this test case.

Test Description: Describe briefly the test objective.

Automated: Indicate if the test is completely automated or being checked manually. (If you have methods running the tests and checking results, select "yes". If you are manually checking results, indicate manual by selecting the "no.")

Results: Indicate if the test passed or failed.

Step #: You will be listing the test steps in order. This number is the step number in the process.

Test Step Description: Details of the test step.

Test Data: What the test data will be for this step. Be clear on what the input data will be. If using a specific file, be clear on the name.

Expected Result: What result are you expecting from the program component or system.

Actual Result: What result were returned based on the test.

Post condition for Test: What will be true after the test has been run? Has the state of the system changed in any way?

Notes: Comments and notes for you and your team members.
