Project Name: Project 1: Voting System	Team# 4		
Test Stage: Unit x System	Test Date: 3/24/22		
Test Case ID#: Party_constructor_2	Name(s) of Testers: Charlie Nazarian, Haneesha Kella		
Test Description: Testing the Party constructor with a single argument – the party name			
Automated: yes_x no	Indicate where are you storing the tests (what file) and the name of the method/functions being used. Tests are stored in PartyTest.cpp. Function being tested		
Results: Pass × Fail	is Party(std::string partyName) (constructor)		
Preconditions for Test: Party.h and Candidate.h are included in the string	ne file, the input parameter is of type		

Step	Test Step	Test	Expected	Actual	
#	Description	Data	Result	Result	Notes
1	Create Party Object with name input	Party Democrat("Democratic")	_	-	
2	Compare actual name with expected name	Democrat.getPartyName()	Expected name: "Democratic"	Actual name: "Democratic"	
3	Compare actual numVotes with expected numVotes	Democrat.getNumVotes()	Expected numVotes: 0	Actual numVotes: 0	
4	Compare candidate vector size with 0	Democrat.getCandidates().size()	Expected size: 0	Actual size: 0	

Post condition(s) for Test:

A Party object is created with the name entered as the parameter, numVotes = 0, and an empty candidates vector.

Project Name: The project #, name of your system, and the team#

Test Stage: Indicate whether it is a unit test or a system test.

Test Date: The date the test was performed.

Test Case ID#: A unique ID is required. Decide on a naming convention and use numbering. Example: Ballot_Shuffle_1

Name(s) of Testers: List the names of anyone involved in running this test case.

Test Description: Describe briefly the test objective.

Automated: Indicate if the test is completely automated or being checked manually. (If you have methods running the tests and checking results, select "yes". If you are manually checking results, indicate manual by selecting the "no.")

Results: Indicate if the test passed or failed.

Step #: You will be listing the test steps in order. This number is the step number in the process.

Test Step Description: Details of the test step.

Test Data: What the test data will be for this step. Be clear on what the input data will be. If using a specific file, be clear on the name.

Expected Result: What result are you expecting from the program component or system.

Actual Result: What result were returned based on the test.

Post condition for Test: What will be true after the test has been run? Has the state of the system changed in any way?

Notes: Comments and notes for you and your team members.
